

RHYS | Engineering and fabrication assistance work done for Flying Carpet Creative

On-site Fabrication  
"Estructuras Monumentales" by Carmen Herrera

In-house Fabrication

# Fabrication

An all in one studio, Fenris specializes in high-quality fabrication in all areas of public art, sculpture, signage, and maintenance. Our projects have few limitations in scale, material, or complexity thanks to a full metal shop, woodshop, CNC lathe, plasma cutter, and laser table.

Whether starting from a simple idea or complex model, we'll work with you in-shop and on-site to ensure your project's exceptional outcome every time.

Plasmacutting

Powdercoating

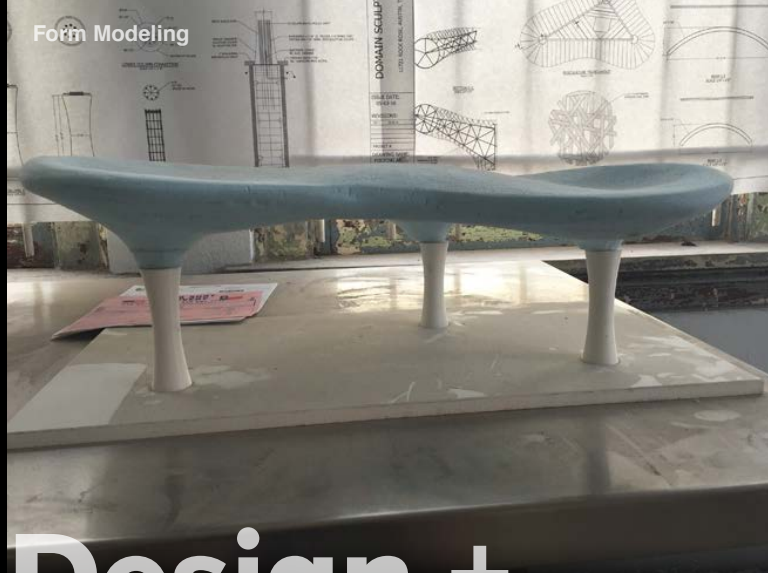

On-site Sculpture Repair  
"Wings over Water" by Joe O'Connell

Municipal Structures

Form Modeling

# Design + Engineering

*At Fenris, we consider design and engineering essential in communicating a transparent and achievable production plan with our clients. Our experience in CAD modeling, physical prototyping, material testing, 3D rendering, simulation software, and electrical and mechanical engineering help visualize the project's specific limitations, budget, and potential.*

*From designed spaces to municipal structures, aeronautical flow simulations, and beyond, multitudes of project planning systems are at our fingertips.*

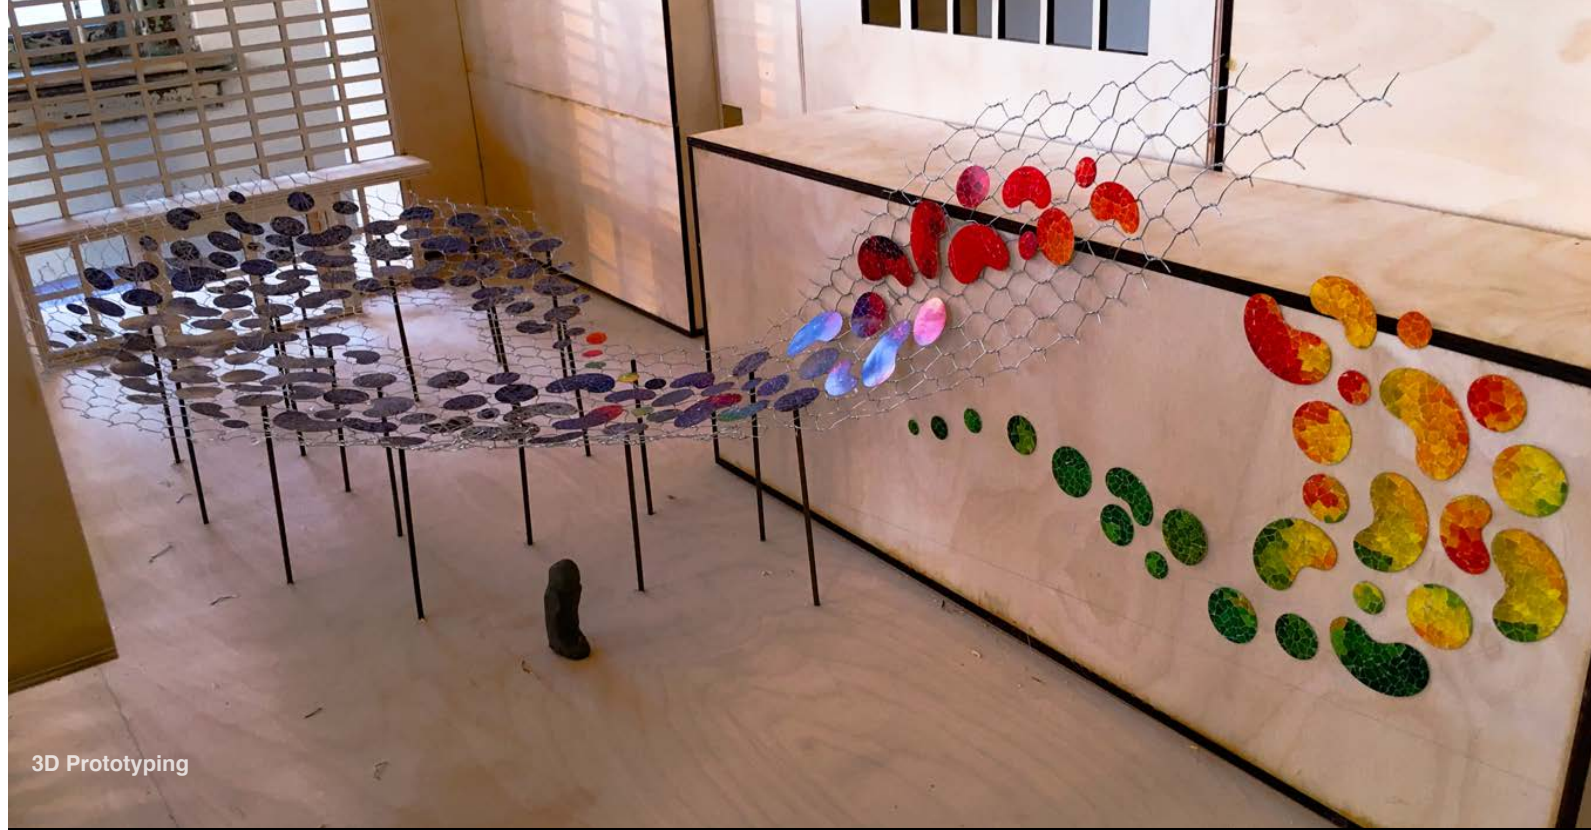

Designed Spaces  
completed for Deuster

3D Rendering

"Refracted" completed for Energy Institute Highschool

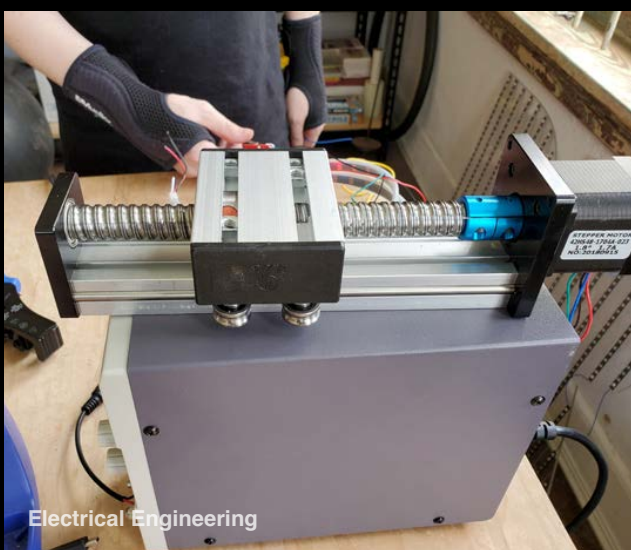

3D Prototyping

Precision Machining

Electrical Engineering

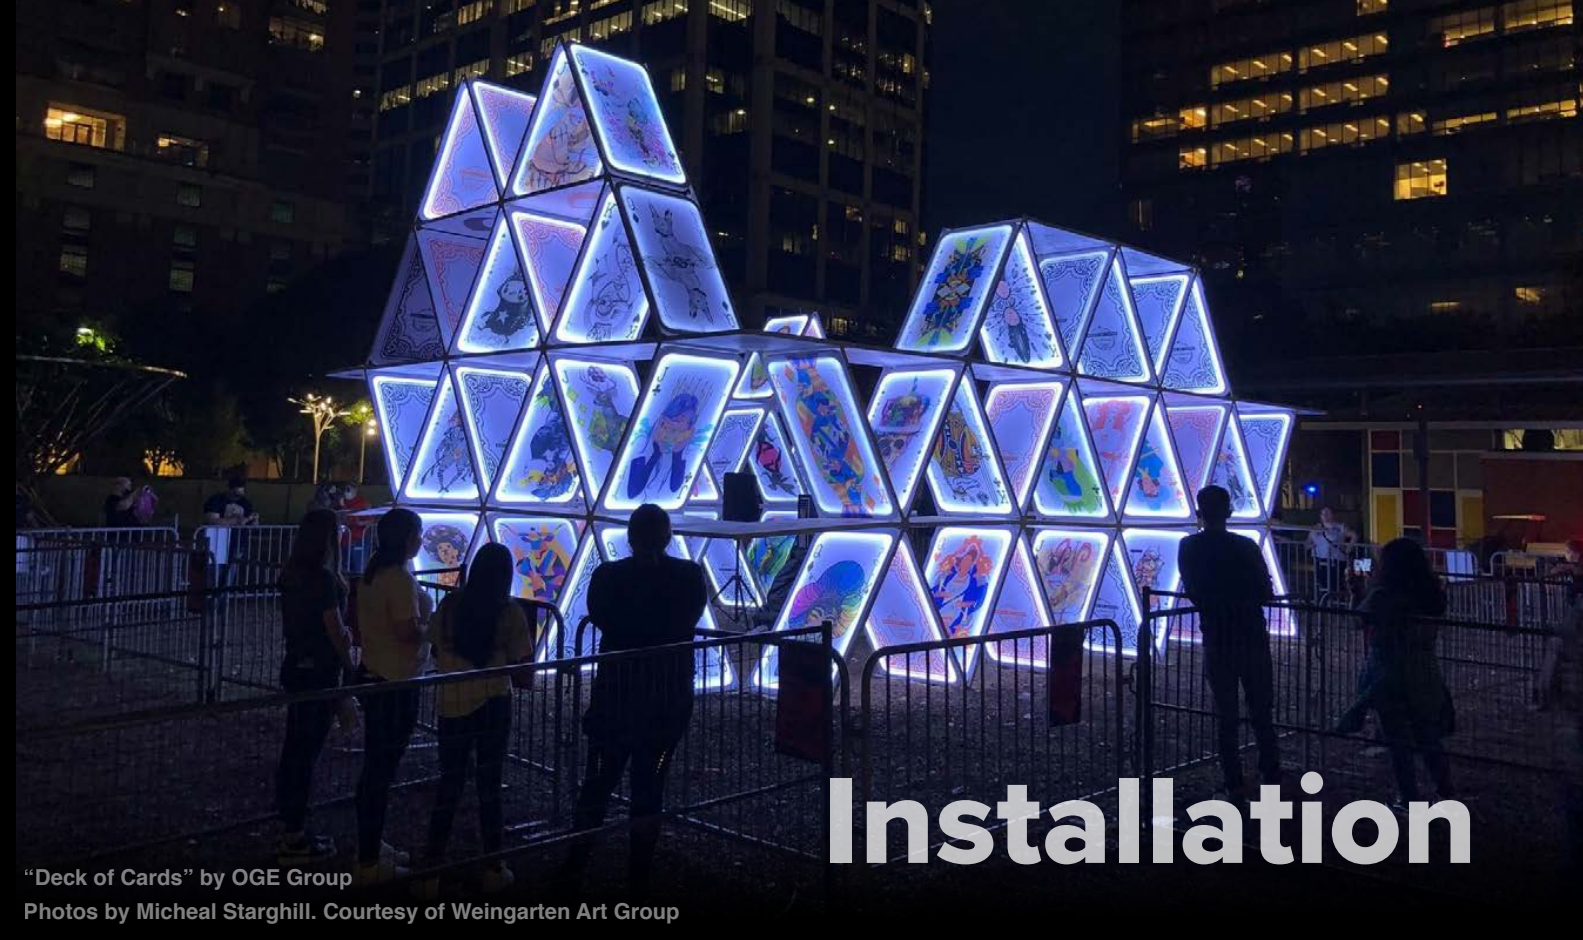

Durable Project Components

Simulation Testing

# Installation

On-site Fabrication

*Fenris considers the installation process the essential last step, tying together all aspects of design and fabrication. Determined by project, we employ a professional team experienced with a vast collection of installation methods and materials to handle the job. This experience ensures an unparalleled level of safety for all project components and installation team members.*

Installation  
"Synchronicity of Color" by Margo Sawyer

*Fenris is a studio of makers. So whether it's suspending multi-story metal sculptures or arranging fragile fixtures of prismatic glass, we understand the importance of handling all work with the same nuanced attention we would our own.*

Project Management
